YOUR HOST

The New York State Pain Society was founded in 2011 to advance the art and science of pain medicine by promoting and maintaining the highest standards of professional practice through education and research; by aiding and encouraging the education of medical students, residents, fellows, practicing physicians, and other health care providers in pain management and by obtaining and publishing scientific information in pain medicine and management.

PURPOSE

The purpose of this program is to educate physicians and healthcare practitioners in evolving advanced acute and chronic pain management and provide a forum for participants to gain valuable understanding in evidenced based techniques, treatments, and solutions for patients suffering from acute and/or chronic pain.

EDUCATIONAL LEARNING OBJECTIVES

At the end of this program, learners should be able to:

- Review current basic science, clinical, and translational research with regard to its applicability to practice and Describe research investigations that study the mechanisms underlying challenging pain syndromes.
- Employ key diagnostic and treatment techniques for the management of pain.
- Address common clinical challenges in the management of acute and chronic pain, including those encountered in special populations.
- Promote appropriate and safe opioid usage in patients.
- Evaluate and debate new trends, techniques, therapies, and diagnostic procedures.
- Increase collaboration between pain specialists and primary care clinicians.
- Improve quality of life for patients suffering from acute or chronic pain.
- Assemble a valuable network of colleagues active in the field of pain medicine.
- Develop an efficient and productive clinical practice to promote maximum opportunity for patients to obtain specialized pain management care
